

The XaTcobeo project will put into orbit the first Spanish [CubeSat](#) and the first Galician satellite. The XaTcobeo project is conducted by the

[University of Vigo](#)

and monitored by the

[Spanish National Institute for Aerospace Technology \(INTA\)](#)

. Most of the regular members of the staff will be students from the University of Vigo. Each work package will be assigned to a particular PhD student and two supervisors, one from the University of Vigo and one from INTA staff.
